

Product information

Milled Fiber CP

Product description

Milled Fiber is made of glass fibers

As filler material (also in combination with chopped glass fiber) or reinforcement especially used in thermoplast and thermoset molding material, in putties and cast resin as well as for foam reinforcement

Technical properties (target values):

	Einheit	CP 160	CP 180	CP 210
Glass type, shape and color		E-glass, powder, white		
Diameter of the filament		9 - 15 µm		
Size		silane base		
Average fibre length	µm	140	160	190
Bulk density	g/l	160	180	210
free flowing property		gut	gut	gut
Weight of packaging	kg	25	25	25
packed on palette 120 x 80 x 170 cm	kg	600	600	600

For detailed technical information of the finally valid production norm, please ask for the technical data sheet.
